EB-585Wi

Our brightest ultra-short-throw projector yet, with dual pen interactivity and widescreen resolution.

Get the classroom involved, using the dual pens to take control of your projection. Featuring a brightness level of 3,300 lumens and WXGA resolution, the EB-585Wi's ultra-short-throw design allows you to present with minimised shadows and glare.

Quality image
Epson's 3LCD technology ensures high-quality images with equally high White and Colour Light Output for vivid colours and bright images, even in daylight, and three times brighter colours than leading competitive projectors[1]. WXGA resolution and HDMI input mean that students benefit from sharp, clear projected images.

Dual pen interactivity
Epson's interactive pens are now even more responsive and easy to use, with an improved design. Dual pen capability allows for simultaneous, collaborative learning with different pen attributes. The 'hover' function accurately detects the position of the pen when it's not in contact with the projection surface.

Reliable
Project for longer with improved reliability and a longer lamp life of up to 6,000 hours.

Save time
Simply plug in and turn on – there's no warm-up time and the PC-free annotation mode means that teachers don't even need to power up their computers. The interactive function does not require drivers to be installed and it auto-calibrates.

Wireless projector
The wireless capability allows you to show content easily from a range of smart devices using the iProjection App[2].

More control and collaboration
Multi-PC projection software allows teachers and students to share their content simultaneously. The moderator function allows teachers to remain in complete control since they can choose what content to display.
